

AquaPalm Wireless Add-on Remote

Add Wireless to Your AquaLink RS Control System

The Jandy AquaPalm brings the power and flexibility of a wireless remote to new or existing AquaLink RS control systems. Designed to be the perfect "must have" add-on, the AquaPalm clearly displays equipment status on its large, backlit screen and allows remote control of your equipment in an attractive, water resistant and portable handheld.

When partnered with an AquaLink RS All Button or OneTouch system, the AquaPalm can control up to 32 auxiliaries such as water features, the AquaPure chlorine generator, and enhanced features of the JandyColors pool and spa lights.

The ultimate accessory for your new or existing AquaLink RS Control System

ADD ON WIRELESS

AquaPalm brings wireless control to your new or existing OneTouch and All Button AquaLink RS systems. Complete control always at your fingertips.

ONE TOUCH ACTIVATION

Activate multiple features with just one button using Jandy's famous OneTouch feature. Create macros like "All Lights On" or "Night Party" for serious power with a simple touch.

WATER PURIFICATION

For pure, sparkling water with no worries, use the AquaPalm to control the AquaPure salt chlorine generator, Jandy's state-of-the-art water purification system.

ACTIVATE LIGHTING

Choose your favorite color of JandyColors pool and spa lights, plus control of landscape lighting from the convenience of your spa.

The Perfect Accessory to Handle Backyard Control

The AquaPalm is Jandy's latest remote bringing the convenience and power of wireless control to existing AquaLink RS control systems. Created to be the "must have" add on, the AquaPalm will put control of your backyard at your fingertips.

ADD TO AN EXISTING AQUALINK SYSTEM

Designed to complement Jandy's OneTouch and All Button control systems, the AquaPalm extends your control to all corners of your backyard. Adding the AquaPalm is a snap because it requires no disruption of existing landscaping or decking, nor do you need to worry about in-wall wiring with this easy to install wireless system.

AT HOME ANYWHERE IN THE BACKYARD

Perfect for late nights in the spa, lounging in the hammock or sunning pool-side, the AquaPalm gives you the freedom to relax yet be in total control. The rugged slip and water resistant housing is at home anywhere in your backyard, even in the water because the AquaPalm floats! Whether you include it with a new system or add it to an existing one, the AquaPalm will be at your command — spa side, pool side, in the cabana or while dining on the patio.

TOTAL CONTROL, IN THE PALM OF YOUR HAND

Control temperature settings, water features, Jandy's AquaPure salt chlorine generator, JandyColors pool and spa lights and so much more. The AquaPalm also adds the innovative and popular OneTouch feature, activating multiple items with the touch of one button.

You can switch from pool to spa, activate the heat to a predetermined temperature, turn on the jets and spa light and even turn off the landscape lights with the touch of a button. There are two OneTouch buttons to program, so be creative! Try a "Night Party" macro that activates all your lights and water features at once or "Clean Pool" to set you pool cleaner in motion and activate the pump.

Take control of your backyard paradise with the ultimate add-on remote, the wireless Jandy AquaPalm.
